

Engineering English Course

This course is designed for engineering professionals who wish to develop the communicative skills and specialist English vocabulary needed to work more confidently and successfully in international contexts. The course will cover topics common to all types of engineering, including electrical, mechanical and civil. Your teacher will have experience in these fields and will be able to help you successfully negotiate all aspects of successful English communication relating to your profession.

Who is this course for?

Professionals working in this field such as quality assurance officers, pharmaceutical lab consultants, test analysts, GIS data collectors, municipal designers are all welcome to apply for this course. Any other professionals working in the Engineering industry are also eligible.

What are the course requirements?

We ask that you complete a short Needs Analysis. We may also ask for an online video assessment (eg. Skype) to establish your motivations and goals and to ascertain your level of English (B2 Upper Intermediate or above is ideal).

How long can I take this course for?

The course is as flexible as you need it to be. You can take it for as little as 1 week or for several months. Classes begin on the first Monday of any month and you can choose a time that is convenient to you - a morning class (9.15-12.30) or an afternoon class (12.40-16.35), or a combination of both.

What topics are covered in this course?

Civil Engineering / Electrical Engineering / Mechanical Engineering

- Procedures
- Precautions
- Monitoring and controlling
